

CP2 Report & Presentation Requirements

Thanhntl2

Duration: 15 minutes + 5 minutes Q&A

Location: In-person at NVH

Presentation Slot Sign-up: Link will be sent to leaders in Slack for Leaders Only. Team leader will book 1 slot for the entire team

Deadline for Presentation Submission: **BEFORE PRESENTATION SLOT in Week 5**

Presentation Slide Submission Link: <https://forms.gle/PeQMA5tWHAVzFpjh8>

Deadline for Paper Report Submission: **23:59', 14/05/2026**

Paper Report Submission Link: <https://forms.gle/y19WqRjYY9SozydE8>

Paper Report (150 points)

1. Executive Summary
 - 1.1. In this section, the team provides the main important points they discovered throughout the sections below; hence, this section is the LAST to be written.
 - 1.2. 1-2 paragraph length only
2. Market Overview
 - 2.1. Market Validation (without MVP testing)
 - 2.1.1. Provide an overview of your market: the name of your market, size of market (TAM, SAM, SOM or other methods), sales data, growth projections, current state of the market, future projections, etc.
 - 2.1.2. Do provide further information if it helps readers (me) understand this complicated market the team is trying to enter
3. Market Analysis
 - 3.1. The team is free to use ANY method or combination of methods to strengthen the conclusion for this section. Some of the common methods include but not limited to: [Porter's Five Forces](#); SWOT; PESTEL; etc.
 - 3.2. Expert Interviews (2 experts, minimum 6 months of experience in relevant field) **Automatic Failure of CP2 if not done. Ask things you cannot find on the internet.**
 - 3.2.1. Profile & contact information of experts: In Appendix
 - 3.2.2. Learning Points from notes taken during interviews in Appendix
 - 3.2.2.1. What does the market look like according to them?
 - 3.2.2.2. What you should beware of?
 - 3.2.2.3. What is their experience with your targeted customers?

- 3.2.2.4. Anything else?
- 3.2.3. The team is encouraged to ask insightful questions to find useful deductions to write in this section. Please do not write the entire conversation here, leave your notes in Appendix. Tell me only what is related to this section.
- 3.3. Provide analysis of the market: Based on the method(s) the team chose to complete above, on the experts' insights, what is the competitiveness (the profit potential) of your market? How can you position your startup to defend against unfavorable conditions or to take advantage of the favorable conditions? What else should your reader know here?
4. Competition (find as many competitors as possible for this section, complete 9 companies & your startup to qualify for highest grade of this section)
 - 4.1. Competitive Analysis Framework:
 - 4.1.1. Complete **Competitive Analysis Framework** following the template: [Competitive Analysis Framework | EXE101 | Thanhnt12](#)
 - 4.1.1.1. Instructions for completing Competitive Analysis Framework:
 - 4.1.1.1.1. Find & fill information for 9 competitors and your own startup in order to qualify for the maximum grade for this section. Students are encouraged to find as many as they can for a more comprehensive analysis in Actionables Drawn from Framework.
 - 4.1.2. After completion of the Competitive Analysis Framework, proceed to complete **Actionables Drawn from Framework** following the template: [Competitive Analysis Framework | EXE101 | Thanhnt12](#)
 - 4.1.2.1. Instructions for completing Actionables Drawn from Framework:
 - 4.1.2.1.1. Using the information provided in Competitive Analysis Framework, fill-in the template.
 - 4.1.2.1.2. The competitions here must be the same as in the framework
 - 4.1.3. Tell me: what commonalities do you see on the tables? What most competitions are doing well or doing badly? Is there an opportunity for you to win?
 - 4.1.4. Note this actionable table helps you synthesize the framework in easy-to-remember sentences. Use this strategically in your analysis
 - 4.2. [Advance, Optional] Competitors' Criteria Table (if you chose to do this, you don't have to do the competitive framework above)
 - 4.2.1. You decide which metric you would use to identify which company is what type of competitor
 - 4.2.2. Define your metrics:

Metrics	Your Startup	Direct competitors	Indirect competitors	Substitute competitors	New entrants
---------	--------------	--------------------	----------------------	------------------------	--------------

Name of metric #1	Define your startup according to metric #1	Define direct competitors according to metric #1	Define indirect competitors according to metric #1	Define substitute competitors according to metric #1	Define new entrants according to metric #1
Name of metric #2	Define your startup according to metric #2	Define direct competitors according to metric #2	Define indirect competitors according to metric #2	Define substitute competitors according to metric #2	Define new entrants according to metric #2
...	...	...	...	...	...

4.2.2.1. Metrics: each metric should be specifically relevant to your sector. For example, if you are a chip designer, your metrics can be: ecosystem of software and services, performance of Relative Throughput/Frames Per Second (FPS)/Flops (Floating Point Operations Per Second), etc.

4.2.2.2. Direct competitors: Same product/service, same target customers, solving the same problems/needs/desires, same approach solving the problems/needs/desires

4.2.2.3. Indirect competitors: Different product/service, same target customers, solving the same problems/needs/desires, different approach solving the problems/needs/desires

4.2.2.4. Substitute competitors: Alternative (replacement) product/service, compete for same target customers

4.2.2.5. New entrants: Same product/service but recently entered the market

4.2.3. Now that you define what constitutes each of the 4 categories of competitor. Place real-life competitors into each category:

Direct competitors	Indirect competitors	Substitute competitors	New entrants
Name of direct competitor #1	Name of indirect competitor #1	Name of substitute competitor #1	Name of new entrants #1
Name of direct competitor #2	Name of indirect competitor #2	Name of substitute competitor #2	Name of new entrants #2
...	...	...	...

4.2.4. Analysis:

4.2.4.1. What is the overall competitive landscape you see?

- 4.2.4.2. What strengths & weaknesses do you see in each category?
- 4.2.4.3. What do you think you should do to win or to defend your startup against them?
- 4.2.4.4. Do you see an opportunity for collaboration or partnership?
- Etc.

5. Buyers

- 5.1. Buyer Personas (a representation of a type of customer, you can draw more than 1 persona as needed)
 - 5.1.1. Personas answer the question “Who are we designing for?”
 - 5.1.2. Define your buyer personas by graphics and/or paragraphs. **For some startups, buyers may not be users.** Buyers are those buying (giving you money) your product/services. They could be businesses or individual consumers depending on the type of startup you decide to build.
 - 5.1.3. Provide the following key elements (be as specific as you can):
 - 5.1.3.1. Descriptive name: A descriptive name for your customer
 - 5.1.3.2. Demographics: Ask yourself, “Who is my buyer?”
 - 5.1.3.2.1. If Buyer is an individual, provides: age, gender, education, income or spending power, place, etc.
 - 5.1.3.2.2. If Buyer is an organization/business, provides: company demographics, such as business size, industry, place and geography, etc.
 - 5.1.3.3. Psychographics: Ask yourself, “why do they buy?”
 - 5.1.3.3.1. Provides values, spending habits or patterns, aspirations that Buyer is looking for when buying
 - 5.1.3.4. Challenges & goals: Ask yourself, “What challenges are your buyers looking to solve and how can your product or service address that need?”
 - 5.1.3.4.1. State the challenges & goal and provide answers to “What are your potential buyers hoping to achieve? What are the effects of achieving this goal for the company and for them personally? What are the consequences of failing to achieve these goals?”
 - 5.1.3.5. Influences: Ask yourself, “What affects a buyer’s buying decisions?”
 - 5.1.3.6. Objections: Putting yourself in your Buyer’s perspective

- 5.1.3.6.1. Answers: What objections or reasons to hesitate will your buyer find when considering your product or service? Are you a new company competing with established competitors? Does your new product seem risky when compared to “tried and true” alternatives?

5.2. Surveys - A survey is any study where you collect data by asking people questions (100 people minimum) [COMPLETE BUYER PERSONA BEFORE WRITING SURVEY] **Automatic Failure of CP2 if not done. Students complete each step below:**

5.2.1. Define your objective and target audience:

5.2.1.1. Clearly explain what you are trying to learn from your survey

5.2.1.2. Clearly explain from whom you are trying to obtain the data:

5.2.1.2.1. After the broad population is defined, tell me your sample - a subset of your target audience who will actually take the survey

5.2.2. Survey method:

5.2.2.1. Define your method:

5.2.2.1.1. Make sure it match your target audience, you stated objective and available resources

5.2.2.1.2. Examples (but not limited to):

5.2.2.1.2.1. Online surveys

5.2.2.1.2.2. Telephone and face-to-face surveys

5.2.2.1.2.3. Panel surveys

5.2.3. Questionnaire Design:

5.2.3.1. Question types used:

5.2.3.1.1. Minimum 2 types: multiple choice, rankings, open-ended responses, likert scale, matrix, slider, ordinal scale, etc.

5.2.3.1.2. Minimum 7 questions

5.2.3.1.2.1. All question should be clear, direct and **without bias** (not a leading question that incentivise respondent to prefer one answer over another)

5.2.4. Recruitment:

5.2.4.1. How do you find the people (your sample) to take your survey?

5.2.4.2. Is the contact information (if you obtained it from another source other than its originator) consistent with any terms of use, any data protection laws?

5.2.5. Incentives and compensation:

- 5.2.5.1. Are you offering any incentives and compensation for survey takers? If you are, provide details.

5.2.6. Anonymity:

- 5.2.6.1. For the purpose of the course, the survey MUST have a demographic section (facts about your survey takers) with questions about either: age, gender, education, etc.
- 5.2.6.2. The survey MUST collect the respondent's email address. The name of respondent are not required

5.2.7. Tools:

- 5.2.7.1. Provide the tools you are using to collect the data and the tools you are using to analyze the data.

5.2.8. Data Retention:

- 5.2.8.1. If data you collect can identify a respondent, the data should be kept in a separate & secure place with anonymised code for each respondent.

5.2.9. Informed Consent:

- 5.2.9.1. No one should ever be compelled to complete your survey.
- 5.2.9.2. Survey is completed based on the voluntary completion, this voluntary completion can be taken as consent for this data to be used in your research.
- 5.2.9.3. If personal data is collected, make sure respondents know that data will not be published and will be destroyed at a given period (I suggest 6 months).

5.2.10. Sampling, Response Rate and Selection:

- 5.2.10.1. If you are claiming that your survey results are applicable to a larger population beyond those that responded (means you have a representative sample), be able to justify your recruitment database was genuinely representative and be sure those who didn't respond would have given the same answers.

5.2.11. Analysis:

- 5.2.11.1. Closed questions can be used for statistical analysis: find differences between groups within the sample or correlations between responses to questions
- 5.2.11.2. Single value statistics, things like: "40% of respondents love this feature on our product" has little research relevance unless

you can compare that to another external figure or other hypothesis.

5.2.12. Conclusions based on survey result

5.2.12.1. At the minimum, answering the following questions:

- 5.2.12.1.1. Demographically, who are they? What does this mean to your startup, your product/service?
- 5.2.12.1.2. What real problems are customers dealing with in your market? Why? How many of them meet the same problems?
- 5.2.12.1.3. Are customers interested in your idea? Why & how?
- 5.2.12.1.4. Are customers willing to pay to get their problem solved? Why & how?
- 5.2.12.1.5. And any other questions you see fit to answer.

5.3. [Advance, Optional] Pain Point Interviews

- What are pain point interviews?
 - 30-40 minutes interview online/via phone
 - Led by 1 person using the script or guide
 - Supported by at least 1 other note taker (can use AI)
 - Focus on hearing stories from the interviewer
- What is the goal?
 - Listen for pains, their severity, context, and any processes surrounding them. If 1 person is conducting the interview, the other listening needs to take notes throughout the interview. Try to capture pains, insight, quotes, and magic-wand wishes so you can see patterns.
 - Scripts evolve between sessions, patterns emerge, and eventually your interviews start to focus on the prioritization of pains versus the digging for pain
- Who are you talking to?
 - **At least 10 people per stakeholders group**
 - Multiple stakeholders groups
- When do you stop?
 - When you can reach diminishing returns from doing another interview
 - When you can almost predict what they will say
 - Usually 2-3 weeks
 - When you can start to finish people's sentences, then you know you have found common pain and common pain is where you find big markets
- What do you learn?
 - Explicit pains, per stakeholders
 - Severity of pains
 - Context and processes surrounding each pain
- Summarize and Synthesize the Pain you heard
 - Step 1: Put the data and thoughts from your interviews into a manageable form by summarizing key points from each interview

- Step 2: Look for patterns. Identify key themes, and then assemble a preliminary hierarchy and priority based on feedbacks from stakeholders
 - Step 3: Extract the key insights. What lies beneath the surface of what people told you? Go beyond what was said
 - Step 4: Craft the message. Find the strongest way to convey the message and meaning.
- Synthesis of your pain point interview gives you a complete overview of where your potential customers and their stakeholders see dangerous weaknesses in their businesses or personal lives.
 - Answer the 3 questions using your result of the interview:
 1. Is there real pain?
 2. What is the pain?
 3. Is there a lot of it?
6. Research final conclusion
- 6.1. Market pains
- 6.1.1. From everything you have done above, is there a real problem/pain/desire? What is the descriptive customer's problem/pain/desire? Is there a lot of it? To what degree can you solve those problems?
- 6.1.2. *Note: merely stating the problems without analysis based on evidence presented above will result in a maximum of 3 out of 5 points for this section*
- 6.2. Market solutions
- 6.2.1. Based on the identified customers' problem above,
- 6.2.1.1. **If it is real, describable and there is a lot of it**, what are your proposed solutions to their problem/pain/desire?
- 6.2.1.2. **If the problem/pain/desire is not real or it is not describable or there is not a lot of it**, what changes are you proposing to your idea? Why are they suitable changes?
- 6.2.2. *Note: merely stating the solutions without explanation based on evidence presented above will result in a maximum of 3 out of 5 points for this section*
7. Appendix
- 7.1. Experts' profile, expert's interview notes
- 7.2. Survey data (raw): this means export the entire data set and put it here, no links. Present data in legible font size. Must have all surveyor's email address at the minimum.
- 7.3. IMPORTANT: to prove your analysis or conclusions in any section, the relevant raw data and information have to be present in the appendix.**

Missing any data will result in ZERO for other sections because the proof is not there.

8. References List
 - 8.1. Follow [Harvard Referencing](#)
9. AI disclosure statement
 - 9.1. Follow the format:
 - 9.1.1. AI Usage Disclosure: This document [include title] was created with assistance from [specify the AI tool]. The content can be viewed here [add link] and has been reviewed and edited by [author's full name]. For more information on the extent and nature of AI usage, please contact the author.

Paper Format

- Font Size: 12 (body text), 12-16 (title, sections)
- Font: Arial or Times New Roman
- Double-spacing, 2.5cm margins
- Citing: [Harvard Referencing](#)
- **Page count: 5-20 pages** (pages beyond 20 will not be graded)
- Page count does not include title page, within tables and figures, footnotes, equations, graphics (photos, charts, etc.) or References list. Extra credits will allow you to exceed HALF a page for each extra credit assignment.

Survey Tool: [Qualtrics](#), Google Forms, etc.

In-person Presentation (50 points | 15 minutes + 5 minutes Q&A)

1. Executive Summary
 - 1.1. Tell me the most important points of the research in 60 seconds.
2. Market Overview
 - 2.1. Concisely show me the most important information to establish the market you are trying to enter.
3. Market Analysis
 - 3.1. Concisely show me all the methods you have chosen to do and the most important finding that the methods allow you to conclude.
 - 3.2. Concisely tell me what the experts told you that is applicable here and how it impact your idea
4. Competition summarised
 - 4.1. Concisely explain Competitive Analysis Framework
 - 4.2. Provide Framework analysis
 - 4.3. [\[Advance, Optional\] Competitors' Criteria Table & Analysis](#)

5. Buyers summarised
 - 5.1. Concisely explain personas graphic(s)
 - 5.2. Concisely explain surveys method & findings
 - 5.3. [\[Advance, Optional\] Pain Point Interviews](#)
6. Research Final Conclusion summarised
 - 6.1. Concisely explain Market pains
 - 6.2. Concisely explain Market solutions
7. Appendix
 - 7.1. Survey raw data (with contacts info)
 - 7.2. Interview notes (with contacts info)
 - 7.3. Competitive Framework
 - 7.4. Any extra credit raw data (with contacts info if applicable)
8. Reference
9. AI disclosure statement

Tool: Canva, Microsoft Powerpoint, Google Slides, Prezi, Keynote, Gamma, etc.

Survey Tool: [Qualtrics](#), Google Forms, etc.

Lecturer's policies:

1. If you believe doing something else beside/in replacement of the guidance I have given you for each Checkpoint is better, DO IT! Keep in mind that some explanation needs to be given for your choice so let me know of your reasoning.
2. All work must be completed by team members: copying or replicating or hiring any other current/past team's work or someone else to do your work will result in a score of ZERO & failure of EXE101 course. Any team member who does not contribute or does not contribute fully on their agreed assigned parts will receive a score of ZERO or a reduction to all checkpoint grades at the end of the semester.
3. Late submission equates to a score of ZERO for the entirety of the submitted work.
4. **AI uses & help are allowed; however,**

Be aware:

- Do NOT trust anything it says. Facts from AI tools can be taken from various sources, some of which are Wiki (Wikipedia is the largest of them). These Wiki sources are editable by ANYONE, so check the authenticity of the source.
- **AI uses' disclosure:** Please include a disclosure statement (a short paragraph) at the end of the presentation and/or report explaining what you used the AI for and what prompts you used to get the results. Failure to include this statement will result in a failing grade for the assignment.
- There are **pass/fail critical-thinking questions** during the presentation of the submitted materials. If the student cannot answer these questions sufficiently, the student will receive a failing grade for the assignment and have to resubmit & represent at a later time.

[Recommendation] Pass/fail critical-thinking questions practice tool: [ChatGPT-Chat with your document](#)

5. Presentation's attendance: All team members are required to be present. Team members who do not attend the presentation receive 50% of the team's score unless provided acceptable reasons for absence with proof (email to thanhntl2@fe.edu.vn). Students should NEVER take a leave of absence in any other class to attend EXE101 checkpoints presentation.
6. Before asking me (your lecturer) to make an exception for you, ask yourself this question first: "Is it impossible to honor my commitment, I mean truly impossible?". If the answer is YES, I am willing to hear your explanation. If the answer is NO, my answer is NO.
